Acknowledge

As we understand that the Project is a step-by- step learning environment that closely simulates the class-room and Lab based learning environment into actual implementation. It is a project implementation at your fingertips!! An electronic, live juncture on the machine that allows you to.

- ✓ Practice step by step i.e. ladder approach.
- ✓ Build a larger more robust application.
- ✓ Usage of certain utilities in applications designed by the user.
- ✓ Single program to unified code leading to a complete application.
- ✓ Learn implementation of concepts in a phased manner.
- ✓ Enhance skills and add value.
- ✓ Work on real life projects.
- ✓ Give a real life scenario and help to create applications more complicated and useful.
- ✓ Mentoring through email support.

We would like to send a great thank you to our professor and other students for the adorable support during the time in the project.

Beside several mistakes we had made in the project, we hope to have more opportunities to widen our knowledge in the web developing world.

We also thank you so much for your information and the “demo” project from India APTECH to help us get more reality experience in this project. Since we have gained more experience from this project, we will not stop learning anything as much as we can to be more successful in the future.

Your Sincerely,

Team Group 01.

Synopsis

The Objective of this program we aim is to give a sample project to work on real life projects. These applications help us build a larger more robust application.

The objective is not to teach us front-end or back-end technology but to provide us with a real life scenario and help us create basic applications using the tools.

Hence, we can revise the chapters before we start with the project.

This project is meant for students like us who have completed the module of

Semester II, as well as special subjects those are Java and C#. These programs should

be done in the Lab sessions with assistance of the faculty if required.

The website (in this project) is a world that brings everything about the software account into your experience.

It is very essential for us that will have a clear understanding of the subject. We

think we should go through the project and solve the assignments as per requirements

given.

Review 01

Design Plan: KeyKiosk	Document Name: Problem Definition	SWD/Form No.01/PD/Ver1.0
Effective Date: 13/4/2024	Version 1.0	Page No: 1 of 52

Problem Definition

In the digital era, the landscape of online services and entertainment platforms has expanded significantly, leading to increased demand for account-based trading. This trend has fueled interest in developing software solutions that support account management across various platforms such as Netflix, Spotify, Zoom, and even AI chat services such as ChatGPT.

The current challenge revolves around creating a software solution called "KeyKiosk", designed to facilitate secure and efficient account management. This requires the development of a JavaFX application that provides users with a platform to manage accounts for various online services.

Based on the needs outlined in the Project Overview, we design an application that will provide the following key features and functions:

Admin:

- ✓ Account Management (System account statistics management)
- ✓ Categories (Product category management)
- ✓ ProductTypes (Product type management)
- ✓ Products (Product Management)
- ✓ SoftwareAccount (Software account management)
- ✓ SoftwareLicenseKey (Activation key management)
- ✓ Orders (Order management)
- ✓ Dashboard (Sales statistics)
- ✓ Login/Register
- ✓ Logout.

Customer Requirements Specifications

I. CRS/Requirements Specifications

Seller Undertaken:

1. List of inputs to the system
 - *Register customer data.*
 - *Product data.*
 - *Order data.*
2. List of outputs expected from the system
 - *Processing customer data registration.*
 - *Processing product data.*
 - *Search products from the database by category, product type...*
 - *Processing customer orders.*
3. Overview of processes involved in the system
 - *Notification of customer information registration results.*
 - *Display product information.*
 - *Notify the order of results.*
 - *Results of adding new product.*

Admin/Project Undertaken:

1. List of inputs to the system
 - *Account role data.*
2. List of outputs expected from the system
 - *Processing data and accounts*
3. Overview of processes involved in the system
 - *Employee account role information.*

II. CRS/Customer Acceptance Criteria

S.No	Customer's Acceptance Criteria
1	Given Administrator:
2	+ When managing accounts, then they can view, add, edit, delete an account from the list
3	+ When managing product categories, then they can view, add, edit, delete a product category from the list
4	+ When managing product types, then they can view, add, edit, delete a product type from the list
5	+ When managing products, then they can view, add, edit, delete a product from the list
6	+ When managing software activation keys, then they can view, add, edit, delete an activation key from the list
7	+ When managing banking transactions, then they can view, add, edit, delete a banking transaction from the list
8	+ When managing the dashboard, then they can view sales statistics
9	Given Customer:
10	+ When adding products to the cart, then they can add selected products to their shopping cart

III. Project Plan

1. Project Details

+ 1. Project Details

Name of the Client: KeyKiosk

+ Date of Project Plan:

13/04/2024

+ Project Vision/Objectives: Keykiosk

To modernize Keykiosk operations, enhancing efficiency in internal management and external transactions. Keykiosk requires a Desktop Application to oversee staff accounts with specific roles and manage customer lists along with their orders.

+ Scope:

The Desktop application for Keykiosk includes all necessary algorithms and data to provide administrators with specific roles access to the list of customers and products. Additionally, it also features functionality for placing orders to purchase products through the application. This encompasses complex data related to other data sources.

+ Our understanding of the client organization:

KeyKiosk is one of the leading businesses in Asia. Their field of operation includes trading and supplying a variety of online accounts across multiple platforms. These services are utilized not only by individual users but also by other organizations in the process of creating and managing accounts.

+ Project Organization with Responsibilities and Authorities:

- *Project Team Leader (PTL)*

2. Project Initiation/Requirement Documents

- *Design Documentation*

- *Installation Guide*

- *User Guide*

3. Deliverables

- *Design Documentation*

- *Installation Guide*

- *User Guide (include of maintenance Manual)*

- *Source Code*

Design Plan: KeyKiosk	Document Name: Testing document	SWD/Form No.08/TD/Ver1.0
Effective Date: 13/4/2024	Version 1.0	Page No: 44 of 52

Testing document

Sr.No	Features Tested	Remarks
1	Login Functionality	Passed: Users can successfully log in with valid credentials.
2	Viewing Products	Passed: Users can view a list of existing products without any issues.
3	Adding a New Product	Passed: Users can add new products to the inventory without any issues.
4	Adding a New Product	Passed: Users can edit the details of existing products without any issues.
5	Deleting a Product	Passed: Users can delete products from the inventory as expected.
6	Search Functionality	Passed: The search feature returns accurate results as expected.
7	Sorting Products	Passed: Users can sort the products based on different criteria (e.g., name, price) successfully.
8	Filtering Products	Passed: Users can filter products based on specific criteria (e.g., category, availability) without any issues.
9	Exporting Products	Passed: The exporting feature functions properly and exports products in the desired format.
10	User Permissions	Passed: User permissions are properly enforced, restricting access to certain features based on user roles.
11	Image Upload	Passed: Users can upload product images without any issues.
12	Product Categories	Passed: Products are organized into categories as expected.
13	Data Validation	Passed: Data validation checks have been improved, minimizing the risk of input errors.
14	Performance Testing	Passed: The user interface is intuitive and easy to navigate.
